

EDI (Electronic Data Interchange)

Wegmans strongly encourages our suppliers to utilize EDI transactions to help ensure effective and accurate communication. The appropriate EDI transactions for each supplier are determined based on replenishment type and flow path.

Wegmans Flow Paths and Related EDI Transactions

- Warehouse EDI Transactions: 875,856,880 (UCS)
- Quick Response EDI Transactions: 850,856,810 (x12)
- DSD (UCC128) EDI Transactions: 850,856,810 (x12)
- Please contact EFTmail@Wegmans.com to setup automated ACH/EFT payments with Wegmans
- The first step in ensuring successful EDI transactions is to verify data alignment (UPC, GTIN, COST, CASE PACK). Refer to the Data Sync section for more information. [Wegmans-Data-Synchronization.pdf](#)
- Once your data is aligned and you are ready to proceed with EDI at Wegmans, please complete an EDI Request Form [For Our Suppliers - Wegmans](#) and submit to the Wegmans Replenishment Team.
- Once approved, you will be sent a link to the Wegmans/OpenText testing website (NCM) to begin the certification process
- If you have any pre-NCM testing questions – contact Neysa Cross, EDI Coordinator B2BEDI@Wegmans.com
- Upon enrollment in the NCM, test application please utilize the FAQ or on-line support

EDI (continued)

VMI: Wegmans is encouraging our VMI suppliers to use Electronic Data Exchange (EDI) in place of faxed sales/promotional logic.

VMI Warehouse EDI Transactions: 852, 855, 856, 880 (UCS)

Wegmans Purchase Order Number Configuration

- Please note that the first two digits of Wegmans PO numbers correspond to the week number, beginning "01" to "52"
- The remaining 4 digits are specifically assigned to each vendor and must fit within your assigned sequence to prevent any EDI issues.

Enhanced EDI for Sales Logic (EDI 852)

- Wegmans transmits sales/promotional logic to vendors every Monday, via the EDI 852
- Please contact Neysa Cross, EDI Coordinator at B2BEDI@Wegmans.com for detailed information on how to gain access to this EDI feed.

Cross Dock - Quick Response

Cross Dock pallets are built store-ready by our Supplier. These pallets are destined and labeled for a specific Store. This process involves an entire pallet of one or more items (rainbow pallet) flowing through the DC and being merged in whole with an outbound truck for Store Delivery. No case handling is required at the DC.

Quick Response Process Flow

1. Ordered quantities are generated directly from a Wegmans Store through either CAO (Computer Assisted Ordering) or by the Wegmans' Replenishment Team
 2. Wegmans' Replenishment Systems generates an **EDI 850 Purchase Order**
 4. At time of Shipment, the Supplier will send an **EDI 856 Advanced Shipment Notification** to Wegmans prior to its arrival
 5. Upon arrival, trailer is docked at a Wegmans DC . The Wegmans' Warehouse systems will direct the accurate movement of product to the destination stores
 7. The supplier invoices Wegmans using standard **EDI 880 Invoice** format
- * Contact Wegmans EDI Coordinator at B2BEDI@Wegmans.com for mapping specifics

Shipping Requirements

- Pallets configured as "Store-ready" for Cross-Docking, pallets should be organized and tagged appropriately to ensure timely & safe handling of product within a Wegmans DC
- If ordered quantities do not assemble into a full 72 cube pallet, it is acceptable for pallets to be "decked", provided adequate labeling and product conditioning can still be met
- Pallets destined for different Stores should each have their own Pallet Label (seen here) and be separated by a pallet
- Pallets should be marked as "mixed product" to ensure proper segregation at a Wegmans DC
- See Pallet Labeling Requirements document for further information

Delivery

Wegmans DC

Warehouse Shipments

- Wegmans leverages SSCC pallet labels to facilitate the inbound process
- An SSCC Pallet Label (Serialized Shipping Container Code) is an Industry Standard & GS1 approved method of communicating contents of a specific pallet of product
- There should be two SSCC labels clearly visible and affixed on the front and side of the pallet, with the label on the top third of the pallet.
- Pallets should be organized and tagged appropriately to ensure timely & safe product handling within a Wegmans DC
- If quantities do not assemble into a full 72 cube pallet, it is acceptable to “deck”, provided adequate labeling and product conditioning are met
- Pallets with multiple items should:
 - Be marked as **“Mixed Pallet”** to ensure proper segregation at a Wegmans DC
 - Be separated by a **pallet** to facilitate efficient depalletizing
 - Each item have its own SSCC Pallet Label

**MIXED PALLET
BREAKDOWN
REQUIRED**

Wegmans prefers the use of a GS1-128 Hybrid Pallet Label. Hybrid pallet labels include:

- 18-digit SSCC barcode
- GS1-128 barcode with applicable Application Identifiers
- Human-readable details are required if pallet is store ready
